**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-56 and 81-108, drawn to an apparatus and method for inputting an instruction to determine an outcome and randomly determining at the terminal a signal representing the outcome to send to each of the terminals for display, classified in class 463, subclass 16.
  - II. Claims 57-80, drawn to defining a plurality of identifiers to differentiate between a plurality of communication terminals, classified in class 463, subclass 47.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because an input is required to determine a random outcome such as in a slot machine (terminal) connected to a network in a casino. The subcombination has separate utility such as a caller identification system.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: In Group I:

- A. the game accessory is one or more die (claims 4, 20, 37, 49, 85, and 99).
- B. the game accessory is a spinner (claims 5, 21, 38, 50, 86, and 100).
- C. the game accessory indicates a special game instruction (claims 6, 22, 39, 51, 87, and 101).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 3, 19, 36, 48, 84, and 98 are generic.

5. In Group I:

- a. the terminal is a speakerphone (claims 12, 28, 40, 52, 90, and 104).
- b. the terminal is a wireless telephone (claims 13, 29, 41, 53, 91, and 105).
- c. the terminal is a walkie talkie (claims 14, 30, 42, 54, 92, and 100).
- d. the terminal is a wireless toy (claims 15, 31, 43, 55, 93, and 107).
- e. the terminal is a transceiver (claims 16, 32, 44, 56, 94, and 108).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 17, 33, 45, 81, and 95 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. This application contains claims directed to the following patentably distinct species of the claimed invention: In Group II:

- I. the game accessory is one or more die (claims 59 and 71).
- II. the game accessory is a spinner (claims 60 and 72).
- III. the game accessory indicates a special game instruction (claims 61 and 73).
- IV. the game accessory is a timer (claims 62 and 74).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 57 and 69 are generic.

7. In Group II:

- i. the terminal is a speakerphone (claims 64 and 76).
- ii. the terminal is a wireless telephone (claims 65 and 77).

- iii. the terminal is a walkie talkie (claims 66 and 78).
- iv. the terminal is a wireless toy (claims 67 and 79).
- v. the terminal is a transceiver (claims 68 and 80).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 57 and 69 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
